

I am on the national and Wi. no call list and get calls daily from telemarketers. The national list and law dont seem to do much and ours not much more. If the federal law doesnt work just leave are state law alone. Maybe someone else will come up with a new law that might protect my rights. It is none of the federal gov bussiness to undo a wisconsin law unless you could fix it. Meybe someone could enforce the laws we have and get my phone to stop ringing. Thank you for absolutely nothing except of costing me tax dollars that are not stoping my phone from ringing
